

Q. How can I report suspicious activity?

Anyone with information about potential drug or criminal activity can pass this information on to the police department at anytime.

The Tip Line can be reached 24 hours a day by dialing 706-278-9085 extension 221. The caller will receive a brief message that will outline what information is needed.

The person's call will be answered by an automated voice mail system and will allow the individual to give information in an anonymous manner. Or, the person can give his or her name and phone number if they wish to be contacted at a later time by an officer.

Callers can leave as much information as they wish, but specific details such as a suspect or victim's name, vehicle type, tag numbers, other names or residence information will be helpful in investigating the crime. In addition to the information above, information about drug activity and the type of drug being used or sold is very important.

We value your input in our efforts to reduce or prevent criminal activity in our community. All tips will be looked at and pursued if warranted. Meaningless messages, gibberish, and issues that are beyond our control will not be processed.
